Daylé García Fernández

Backend Developer · Java / Spring Boot
garciadayle2004@gmail.com · Ambato, Ecuador
linkedin.com/in/dayle-garcia · github.com/dageus15 · dageus15.github.io

PROFESSIONAL SUMMARY

Backend developer building Java and Spring Boot microservices: REST API design, PostgreSQL persistence, Swagger/OpenAPI documentation and Mockito unit testing within a Scrum team. Also maintains legacy Spring MVC apps and builds side projects in NestJS and Next.js.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring MVC, Maven, microservices, REST APIs, JPA/Hibernate, Swagger/OpenAPI, JWT
Testing & DevOps: Mockito, Docker & Docker Compose, Git/GitHub, CI/CD (GitHub Actions), Azure, Vercel, Jira
Databases: PostgreSQL, MySQL, MongoDB, SQL, PL/SQL
Other backend: Node.js, NestJS, Prisma, gRPC, NATS
Frontend & mobile: Flutter (Dart), Next.js, React, React Native, TypeScript, Tailwind CSS
Methodologies: Scrum, Kanban, cross-functional teams

PROFESSIONAL EXPERIENCE

Backend Software Developer Feb 2026 – Present
Alquimiasoft S.A. · Ambato, Ecuador

- Build and maintain Java/Spring Boot microservices: REST APIs, business logic and PostgreSQL persistence.
- Delivered 10+ CRUD modules in the main API service, including the invoicing module and shared utility endpoints for other teams.
- Extend and support legacy Spring MVC applications, adding features and fixing defects in inherited code.
- Document APIs with Swagger/OpenAPI and cover features with Mockito unit tests, consistently keeping 95%+ code coverage.
- Containerize services with Docker, manage the codebase in Git/GitHub (branches, PRs, code review) and build Flutter UIs consuming the backend, working in a Scrum team on a Jira Kanban board.

SELECTED PROJECTS

KAPHIY — Order automation platform with conversational AI 2026
NestJS, Prisma, PostgreSQL, Next.js, Socket.IO, Gemini API, Docker, GitHub Actions

- Built the data model, ordering API and WebSocket channel on a team of four.
  The live ordering system integrates with the client's ERP and includes 165 automated tests.

Gasoline System — Distributed fuel-control platform 2025 – 2026
NestJS, gRPC, NATS, Prisma, PostgreSQL, MongoDB, Docker Compose, JWT

- Implemented microservices, gRPC contracts and NATS events on a team of four.
  The system tracks fleet fuel consumption with services running in separate containers.

Accounting Module · Miñarica Water Board 2026
DIVISO outreach, UTA · NestJS, TypeScript, Prisma, MySQL, JWT, React, Tailwind

- Built the double-entry accounting module with NestJS, Prisma and React.
  Journal entries, period closing, chart of accounts, receivables and financial reports.

EDUCATION

Software Engineering Expected graduation: Jul 2027
Universidad Técnica de Ambato (UTA) · Ambato, Ecuador

- Relevant coursework: Software Design Patterns, Service-Oriented Applications, Databases, OOP, Computer Networks.

CERTIFICATIONS

- Cambridge B2 First (FCE), Grade B — CEFR level B2 · Cambridge Assessment English (2021)
- Business Intelligence: Power BI, data analysis and ETL fundamentals · badges at credly.com/users/dayle-garcia
- Network Support and Security · Cisco Networking Academy (2024)
- IoT Design & Monitoring for Energy Systems with ESP32 (32 h) · FISEI – UTA (2025)
